

Curriculum

Primary Curriculum

The school follows a CBSE syllabus, which includes project-based assignments, library and internet based research, hands on activities, assignments that foster creative expression and syllabus based assessments. The timetable includes academics as well as computer science, sports, dance, drama, music, fine arts, library, fitness and yoga.

At present we have classes from Nursery to Class VIII.

At FIS, the teacher uses an optimum setting to support, facilitate, stimulate and direct student interactions in the most discreet manner within the spacious classrooms.

Furniture for instance, is effectively rearranged in order to accommodate group discussions, projects and dramatizations that are so essential to the student-centric system of learning. The faculty with its exceptional inter-disciplinary teaching methods, support such a curriculum that is experiential and dynamic.

The faculty with its exceptional inter-disciplinary teaching methods, support such a curriculum that is experiential and dynamic.

Student centred teaching also believes in utilizing the multiple intelligences tool to identify each student's strengths and weaknesses, so that the same topic may be taught from complementary angles, making learning easy. Today, children are independent learners, and are increasingly becoming techno-savvy at a very tender age. We believe in stimulating the child's imagination by providing opportunities to grow and develop while reading, listening and playing.

At Freedom International School we ensure that the first streak of self-awareness blooms into a shower of self-acquired knowledge, at a pace that suits each individual child.

Future Value Additions - A museum specially dedicated to our freedom fighters

- Open Air Theatre to accommodate over 800 students
- Special language laboratories
- Separate facilities for music, dance, drama, yoga and fine arts.
- Sports complex for indoor sports
- Cafeteria and lunch rooms

- Lifts
